

A Bodi Assignment Tracker

Instructions

Introduction

This assignment tracker is a highly customizable Google Sheets tool designed to help you organize assignments and due dates from multiple syllabi in one place. You can use it to:

- Track assignments and exams
- Plan weekly to-do lists
- See upcoming deadlines at a glance
- Monitor your progress throughout the semester

These instructions are written for users with little or no Google Sheets experience. If you have questions, please email abodi@alumni.purdue.edu, including "Assignment Tracker" in the subject line.

 Assignment Tracker Template

 A Bodi Assignment Tracker & Digital Tools

New Spring 2026

An extended version of the tracker is available. The extended version features twelve monthly spreads and has space for up to ten assignments on each date.

Grading scales can be customized. See instructions for doing so under the Programming Tab section of the instructions.

Pre-built templates for individuals with colorblindness are available in both the Wong and Tol palettes.

A Troubleshooting/FAQ section has been added to the end of the instructions document to address most issues.

To see all offerings, see the A Bodi Assignment Tracker & Digital Tools folder, linked above.

Make a Copy

You must make your own copy before using the tracker. Requests for edit access will be denied.

1. Open the  Assignment Tracker Template .
2. Click **File** → **Make a Copy**.
3. Select a location within your Google Drive to save your copy.
4. Click **Make a Copy**.

What you should see

- You can click cells and type
- You will not see "View only" at the top of the template

Setting Up Your Assignment Tracker

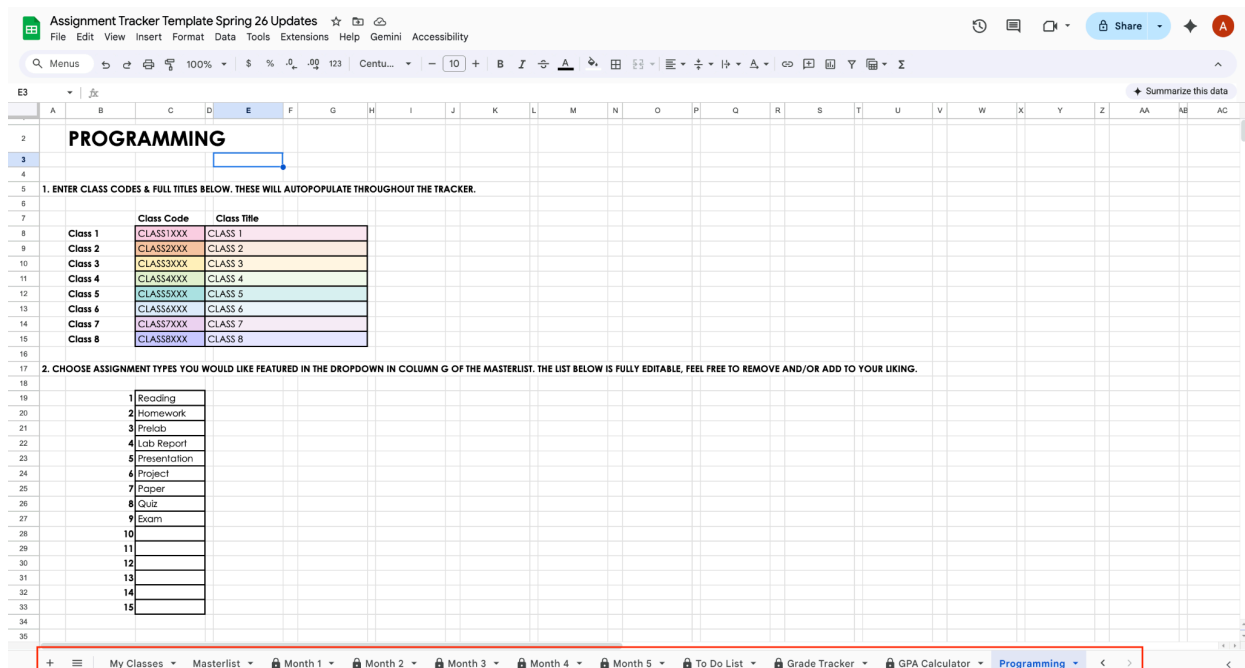

Recommended Set Up Order

1. Programming tab
2. My Classes tab
3. Calendar set up
4. Enter Assignments on the Masterlist

Note: All references to row and column numbers (e.g., C14), are based on the default template layout. If you insert rows above these sections, the numbers may change.

Programming Tab

The programming tab is where you enter information that the rest of the tracker relies on. Typically, this tab only needs to be updated at the beginning of each semester. It can be found in the sheet tabs, which are found at the bottom of your screen.

Entering your classes

The tracker is set up for up to 8 classes by default. Edits can be made to support more classes, and extra classes can be removed (see [Changing number of classes](#)).

Each class is automatically assigned a color:

- Class 1, in row 6, will be pink.
- Class 2, in row 7, will be orange.
- Class 3, in row 8, will be yellow.

- Class 4, in row 9, will be green.
- Class 5, in row 10, will be turquoise.
- Class 6, in row 11, will be blue.
- Class 7, in row 12, will be violet.
- Class 8, in row 13, will be indigo.

Enter the short-hand code for your classes in column B and the full title in column D:I.
This information will populate throughout the tracker.

What you should see

- Your class codes should appear as options in the dropdown menu in column F on the Masterlist tab.
- Rows in the Masterlist should change color when a class is selected.

Troubleshooting

- If your classes are *not* appearing in the dropdown, ensure you are entering them on the Programming tab, not the My Classes tab.

Enter assignment types

In section 2 of the Programming tab, enter the types of work used in your courses. Default options are entered, but you can remove options that won't apply to your classes or enter additional options in the outlines boxes as needed. Default options are:

- Reading
- Homework
- Prelab
- Lab Report
- Presentation
- Project
- Paper
- Quiz
- Exam

What you should see

- Your chosen assignment types appear as options in column G on the Masterlist tab.

Enter status options

Section 3 of the Programming tab is used to select what options you would like to appear in the Assignment Status column on the Masterlist, which is also populated on the calendar spreads. The default options are:

- **Not Started**: For assignments that you haven't begun working on yet.
- **In Progress**: For assignments that you're currently working on.
- **Complete**: For assignments that you've completed, but have not yet submitted through Brightspace/Gradescope/Email/etc.
- **Submitted**: For assignments that have been turned in. Selecting this option will automatically strike out text in this line and remove its color.
- **N/A**: For assignments that don't have an applicable status, such as exam dates.

You can delete or edit status options as you desire. If you prefer check boxes to a drop down menu, see [Replace status with checkboxes](#). Conditional formatting for each status option can be edited on individual tabs - for a tutorial, see [here](#).

What you should see

- Your status options are available under the dropdown menu in column B of the Masterlist.

Customize grading scales

If you plan on using the Grade Tracker, you can update the default grading scale information for each class by updating the corresponding percentage ranges for each letter grade in section 4. If your class does not offer a particular grade, such as +/- scores, simply leave the corresponding sections blank.

Customize GPA grade points

If you plan on using the GPA calculator, you can customize the grade points assigned to each letter grade in section 5 of the Programming tab. Simply enter the number GPA grade value for each letter grade in the corresponding cell in section 5. Default values are available for a standard grading scale.

Customize the My Classes tab

The My Classes tab is automatically updated with class codes and titles based on what you previously entered in the Programming tab. You can fill in information about your professors and class schedule in the corresponding boxes:

BIOL 110		
SCHEDULE	Lecture: MW 11:30 - 12:20; Recitation: T 7:30 - 8:20, Lab: H 9:30 - 10:20	
PROFESSOR(S)	Sean Humphrey, Mark Browning	
COMPLETED ASSIGNMENTS		0
TOTAL ASSIGNMENTS		0
PERCENT COMPLETED		#DIV/0!

The rest of the information in the progress boxes will be updated automatically as you use the assignment tracker. No manual calculations are required.

Adjusting the calendar for a new semester

Each calendar spread automatically updates based on the settings on the Month 1 tab.

1. Go to the Month 1 tab.
2. In cell X6, enter the year.
3. In cell X8, select your starting month from the drop down.
4. In cell X10, select whether you would like your calendar to start on Sunday or Monday.
5. Rename each tab for the month it features by double-clicking the current name.

What you should see

- Dates update across all calendar tabs

Enter assignments

The Masterlist is where most of your work happens. The status, due date, class, and assignment columns are required. Information in the other columns is optional.

Under the due date column, enter the date your assignment is due in column D. Column C will automatically fill in the day of the week the due date falls on.

C	D
DUE DATE	
Tue	8/23/2022

As you enter assignments, you'll notice that exams are automatically **bolded** and **highlighted** under column G and that the Days Until Due counter in column I is **highlighted** when an assignment is due in less than 2 days.

● What you should see

- Rows change color when you select a class in column F
- Day of the week is automatically filled in when you enter a date in column D
- Lines are struck out when assignment status is changed to Submitted
- Near-due and overdue assignments are highlighted

Pull together your syllabi and begin entering classes! They do not need to be in any particular order, since you can sort them using the built in filter. I find it easiest to go class by class, entering information for each and every assignment. If this feels like a lot at first, that's normal — most of the work happens once at the beginning of the semester.

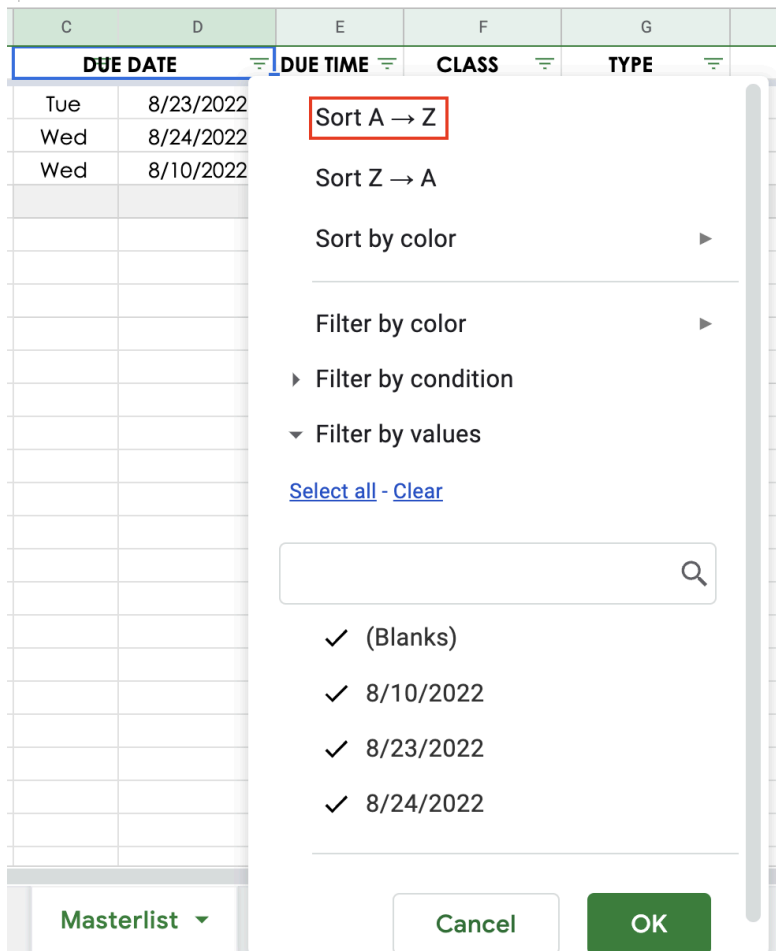

Sort your assignments by due date

Once all your assignments are entered, use the built in filter to sort them by due date, so that your most pressing assignments are at the top.

1. Click the small triangle in the Due Date column header (seen below).

C	D
DUE DATE	

2. Choose **Sort A → Z**.

What you should see

- Assignments listed from earliest to latest due date

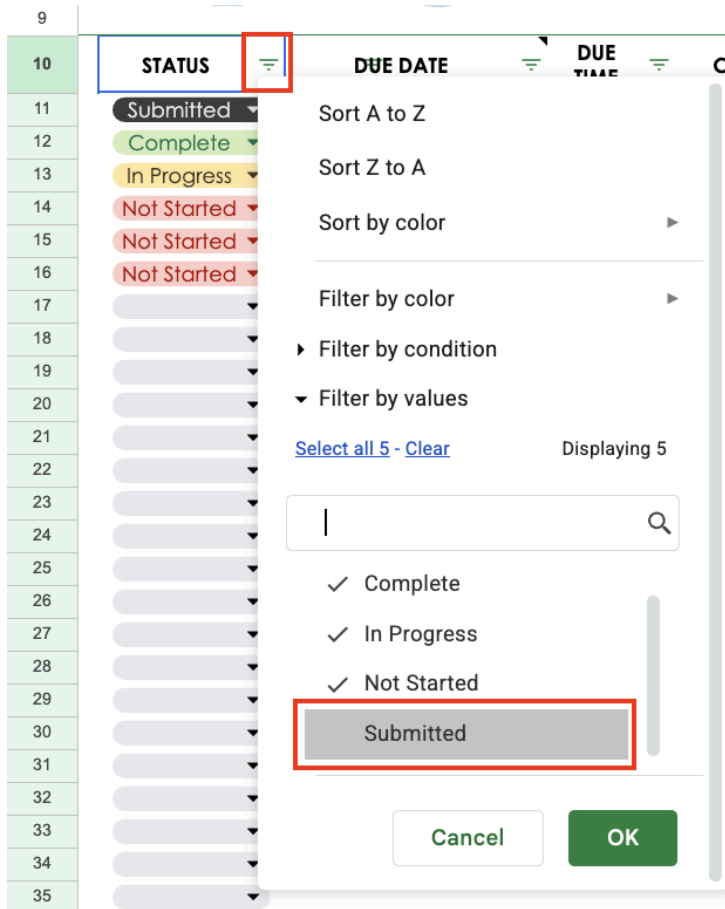

Hide submitted assignments

Submitted assignments can be temporarily hidden from the Masterlist to prevent them from taking up space.

1. Click the small triangle in the Status column header (seen below).

2. Uncheck the "Submitted" option.

What you should see

- Assignments with the Submitted status option are filtered out and not visible
- Submitted assignments can be un-filtered by re-selecting the submitted option

Use the To-Do list

1. Go to the Masterlist tab.
2. Check the box in column J to send corresponding assignments to the To Do List.
3. The assignment appears on the To Do List tab.
4. Add priority or notes as needed.

Note: Checking off tasks on the to do list does not change the assignments status on the masterlist. To remove items from the to do list, uncheck the box in the To Do List column on the Masterlist.

What you should see

- Checked items appear on the To Do List tab

- Tasks marked completed on the to do list are struck out.

Track Grades (optional)

The Grade Tracker tab automatically populates assignments (excluding readings) from the Masterlist. Do not edit the cells on the Grade Tracker - everything is pulled from the Masterlist.

The Masterlist accommodates up to 8 classes at this time.

 Do not edit any cells on this tab. All values are pulled automatically from the Programming tab and Masterlist.

GPA Calculator

You can utilize the GPA Calculator tab to keep track of your GPA throughout your college career. To set it up properly, complete the following steps:

1. The GPA Grade Points are pulled from the programming tab.
2. Enter classes, credits, and grades by semester.
3. Check boxes corresponding with classes that contribute to your GPA.
4. Do not edit gray cells.

**gpa

Tips for Success

- Plan weekly (spend 10-20 minutes)
- Update status as you complete work
- Use filters to reduce stress
- Adjust the tracker to fit your workflow

Advanced Customization Options

These features are optional and recommended only if you are comfortable carefully following step-by-step instructions. If the tracker is working for you as-is, you can safely skip this entire section.

 Make a backup copy before proceeding.

Changing class colors

The pastel colors that come preprogrammed can be changed to better fit your style.

Note, pre-programmed color-blind friendly templates are available:

-  Assignment Tracker Template for Colorblindness - Tol Palette
-  Assignment Tracker Template for Colorblindness - Wong Palette

1. First, choose the colors you would like to use.
 - i. For a brights palette, suggested colors are: **FF0000**, **FF7F00**, **FFFF00**, **00FF00**, **0000FF**, **4B0082**, **9400D3**, and **FF1493**.
 - ii. For a palette that matches Google Drive folder color options, suggested colors are: **F73A23**, **#FFAD47**, **FBE883**, **B3DC6D**, **43D693**, **4986E7**, **B99AFF**, and **F591B3**.
 - iii. The original colors are **FCCFE3**, **F9C7A2**, **FFF1BD**, **E1F3D1**, **AEE5E3**, **DEEEFA**, **EDD2F0** and **C9C9FF**.
2. On the *My Classes* tab, simply change the fill color of the applicable cells using the painbucket tool.
3. Go to the *Masterlist* tab:
 - i. Select columns C through M.
 - ii. Go to Format → Conditional Formatting.

- iii. Select the rule you would like to change. DO NOT change the formula. Under "Formatting Style" change the fill and text color as needed to match the colors you used on the *My Classes* tab.
 - iv. Repeat as necessary until all rules reflect your new colors.
4. On the *Month 1* tab:
- i. select columns B through V.
 - ii. Repeat steps 3ii through 3iv.
5. On all other monthly spread tabs:
- i. Highlight the entirety of the *Month 1* tab - you can do this by clicking the empty square located at the top-left corner of the sheet, right between the 'A' column header and the '1' row header.
 - ii. Go to Edit → Copy to copy the selected cells.
 - iii. Go to the *Month 2* tab and highlight the entire sheet.
 - iv. Go to Edit → Paste special → Conditional formatting only. DO NOT use the normal paste option.
 - v. Delete the old, now irrelevant Conditional Formatting rules.
 - vi. Repeat on *Month 3, Month 4, Month 5, etc.*
6. On the *To Do List* tab:
- i. Select column F.
 - ii. Repeat steps 3ii through 3iv.
7. On the *Grade Tracker* tab:
- i. Manually change the color of each header row, like you did on the *My Classes* tab.
 - ii. For Class 1, highlight cells B18:G300 and manually change the color to a tone that corresponds with the header. Only rows with information will change immediately, but the color will be remembered for future rows as long as you highlight the whole column.
 - iii. Repeat 7ii for the corresponding cells under Classes 2-6.

Changing Fonts

To change the font or font size, you can simply select the cells you want to change and use the toolbar to update.!

Changing number of classes

The tracker is set up for 8 classes by default. You can add more or remove unused ones.

Adding extra classes

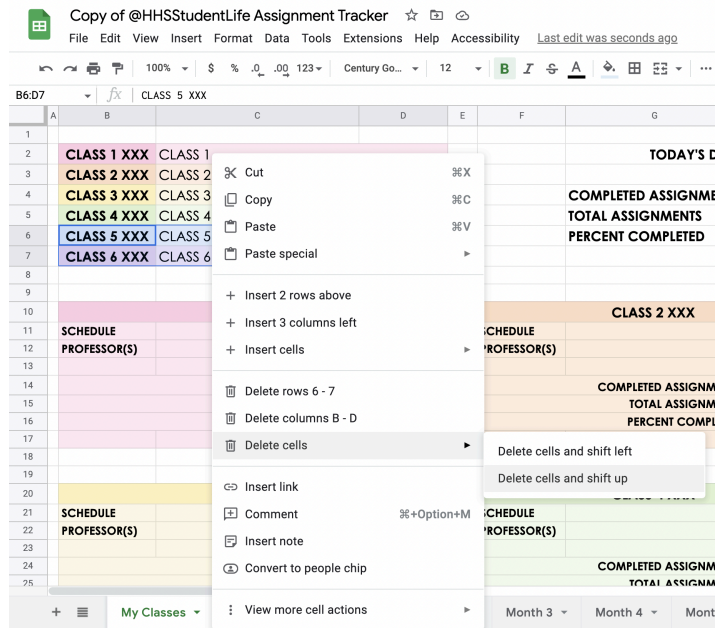

1. Update the Programming tab
 - i. Insert a new row underneath row 13.
 - ii. In the new row, select cell C14, and enter the new class code. Enter the full title in cell D13.
 - iii. Change the fill color of this row to the color you want associated with the class.
2. Fixing the *My Classes* tab
 - i. Insert a new row beneath row 9.
 - ii. In the new row, select cell B10 and enter `=Programming!C14`.
 - iii. In the new row, select cell C10 and enter `=Programming!D14`.
 - iv. Change the fill color of this row to the color you want associated with the new class.
 - v. Create new schedule/progress boxes
 - a. Copy one entire existing schedule/progress box (i.e., cells B12:D19).
 - b. Paste it below the last box (typically cell B51).
 - c. Change the fill color to match your new class color using the paint bucket tool.
 - d. In the header of your new cell (typically cell B51, enter `=Programming!C14`.
 - e. Update progress formulas
 1. Delete the existing formula next to Completed Assignments (typically cell B55) and enter:
`=COUNTIFS(Masterlist!F11:F2251,B10,Masterlist!B11:2251,"Submitted")`
 2. Delete the existing formula next to Total Assignments (typically cell B56) and enter:
`=COUNTIF(Masterlist!F11:F250,B10)`
3. Fixing the *Masterlist* tab:
 - i. Add conditional formatting for the new class:
 - a. Go to the Masterlist tab.

- b. Highlight columns C through I.
 - c. Go to **Format** → **Conditional formatting**.
 - d. Click **Add another rule**.
 - e. Set Format cells if to **Custom formula is**
 - f. Enter: `=F1=INDIRECT("My Classes!B10")`
 - g. Choose the fill color used on the My Classes tab.
 - h. Click **Done**.
 - ii. Make the "Class" dropdown include your new class.
 - a. Go to **Data** → **Data validation**.
 - b. Select the rule covering column F
 - c. Edit the formula to `=Programming!$C$6:$C$14`.
 - d. Click **Done**.
4. On the monthly spread tabs, highlight columns B through V and repeat steps 3ic to 3ih.
5. On the *To Do List* tab, highlight columns C through F and repeat steps 3ic to 3ih.

Removing extra classes

If you are using fewer than 6 classes, you may remove unused ones — or simply leave them blank.

1. On the My Classes tab, highlight the unused class cells.
2. Right-click → **Delete cells** → **Delete cells and shift up**.
3. Delete the corresponding schedule and progress boxes in the same way.

4. On the *Masterlist*, monthly spread, *To Do List* and *Grade Calculator* tabs, delete the corresponding conditional formatting rules.
 - i. Go to **Format** → **Conditional formatting**.
 - ii. Delete rules associated with the removed class (trash can icon).
 - iii. Ensure remaining rules reference the correct class cells.

Replace status with checkboxes

If you prefer, you can change the status column on the *Masterlist* from the text options to simple checkboxes. This will result in the status auto populating in the monthly spreads as "FALSE" (not completed) or "TRUE" (completed).

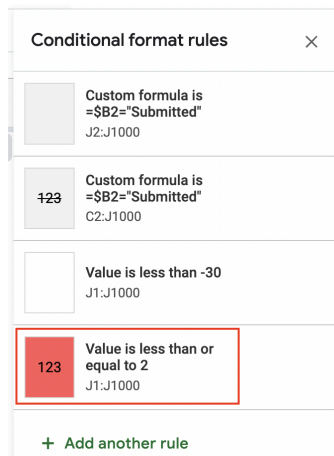

1. Go to the *Masterlist* tab.
2. Highlight column B.
3. Go to **Data** → **Data validation** and select the trash can icon next to the rule corresponding to range B11:B1251 (B11:B2251 on the extended version).
4. Select B11:B1251 (or B11:B2251 for the extended version) and select **Insert** → **Checkbox**
5. Update conditional formatting:
 - i. Highlight columns C through J. Go to **Format** → **Conditional formatting**.
 - ii. Select "Custom formula is" `=B1="Submitted"`

- iii. Under Formal Rules, ensure that Format cells if “Custom formula is” is selected.
 - iv. In the Value or Formula box, enter: `=B1=TRUE`
 - v. Adjust formatting if desired (default strikes through the row).
 - vi. Click **Done**.
6. Update class progress calculation:
- i. Change the formula in cell H4 on the *My Classes* tab to:
`=COUNTIF(Masterlist!B8:B1007,"True")`
 - ii. In each class progress box, update the formula next to “Completed Assignments” to say “True” instead of “Submitted.”

Changing the Days Until Due Warning

By default, assignments due in 2 days or less are highlighted.

1. Go to the Masterlist tab.
2. Highlight column I.
3. Go to **Format** → **Conditional formatting**.
4. Click the rule titled “**Value is less than or equal to 2**” to edit.

5. Change the number in the “Value or formula” box to your preferred number of days for a warning. You can also change the formatting style here.

6. Click Done to save the rule.

Troubleshooting/FAQ

I can't make a copy.

Do not request edit access - it will be denied. Instead, ensure you are attempting to make the copy on your Google Drive, rather than in the A Bodi Assignment Tracker & Digital Tools folder. This is the most frequent issue students run into trying to make a copy.

Dropdown menus are empty or missing options.

This usually means the programming tab has not been completed. Try this:

1. Go to the Programming tab.
2. Make sure you've entered:
 - i. Class names/class codes
 - ii. Assignment types
 - iii. Status Options
3. Return to the Masterlist and click a dropdown again.

What you should see

- Dropdowns now contain the options you entered on the Programming tab.

Do not delete cells on the Programming tab — only type into the labeled entry areas.

Rows are not changing color when I select a class

This is almost always a conditional formatting issue. Check the following:

1. On the Masterlist tab, confirm that column F (Class) is filled in.
2. Make sure the class name exactly matches the entry in the Programming tab.
3. If you recently added or removed classes, conditional formatting rules may need to be updated. Reference the [Changing number of classes](#) section above.
 - i. To check formatting:
 - a. Go to **Format** → **Conditional formatting**.
 - b. Confirm a rule for each class exists.
 - c. Make sure the rule references the correct cell on the Programming tab.

What you should see

- The entire row on the Masterlist changes color based on the selected class

My monthly spreads aren't working.

This usually happens if:

- The due date is missing.
- The date is not in a recognizable format.
- The formulas have been broken.

To fix it:

1. Go to the Masterlist tab.
2. Confirm the due date:
 - i. Uses a valid date format (MM/DD/YYYY)
 - ii. Is entered as a date, not text.
 - iii. Make sure the assignment's month and year are accurate and match the monthly spread you're viewing.
3. To fix broken formulas, go to the [original template](#) (or the [extended version](#)).
 - i. Locate the monthly spread you're having trouble with - it must be the same sheet.
 - ii. Highlight and copy the entire sheet.
 - iii. Paste into your copy.

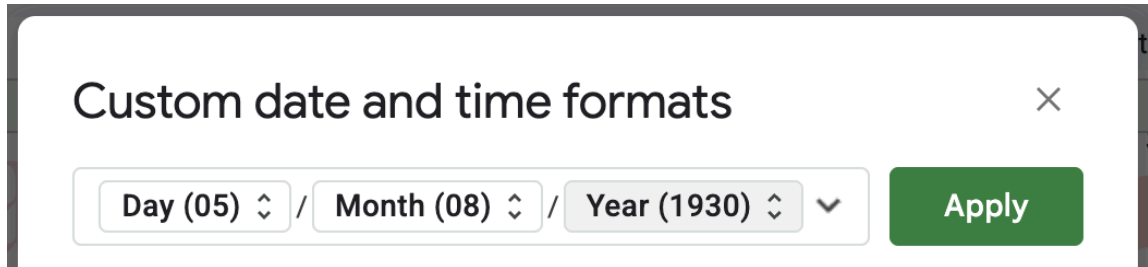

What you should see

- Assignments appear automatically on the correct monthly spread.

I prefer DD/MM/YYYY date formatting. Can I adjust this?

1. Go to the Masterlist tab.
2. Highlight column D.
3. Go to **Format** → **Number** → **Custom date and time**.
4. Customize your date format using the dropdown menu. For DD/MM/YYYY format, your entry should look like this:

5. Select **Apply**.

My class/institution uses a different grading scale than Purdue.

New to the Spring 2026 version of the tracker, grading scales can be customized for individual classes. See [Customize grading scales](#) under the Programming tab section.

I want to track an entire year at a time or I want more than five assignments per date on my monthly spreads.

New to the Spring 2026 updated version of the tracker is the extended edition. The extended edition features twelve monthly spreads and can display up to ten assignments per date on the monthly spread tabs. Extra monthly spread tabs can be deleted if you plan on tracking semester by semester, but still want to see up to ten assignments per date on the monthly spread.

I accidentally deleted something important.

Always make a backup copy before making advanced changes. Your best option once something is deleted or formulas are broken is to restore a previous version:

1. Select **File**.
2. Under **Version history**, select **See version history**.
3. Select a previous version of your tracker.

If that doesn't work, make a fresh copy of the original template and re-enter only the information on the Programming tab and your assignment data. In most cases, assignment data can be copy and pasted from your previous tracker.

Still stuck?

If something still isn't working:

- Re-read the section you're working on slowly.
- Make sure you're on the correct tab.
- Reach out to abodi@alumni.purdue.edu for help. Please be patient, as Alaina is no longer a student and works full time.
